

Name: Robert Allen

Project: Paint

Requirements:

- **US-01** As a user I can save my image.
- **US-02** As a user I can load an image.
- **US-03** As a user I can rotate the canvas.

Use Case Document(s):

Use Case ID:	US-01
Use Case Name:	As a user I can save my image.
Description:	Users are able to write their images to a file for later editing.

Actors	Users											
Pre-conditions:	A user has created or opened an image.											
Post-conditions:	A file has been written to the path in the file system specified by the user.											
Frequency of Use:	Hourly											
Flow of Events	<table><tr><th></th><th>Actor Action</th><th>System Response</th></tr><tr><td>1</td><td>Click on File->Save as</td><td>Bring up the save dialog</td></tr><tr><td>2</td><td>Enter a path to save to and click the Save button.</td><td>Write the file to the filesystem at the specified path.</td></tr></table>				Actor Action	System Response	1	Click on File->Save as	Bring up the save dialog	2	Enter a path to save to and click the Save button.	Write the file to the filesystem at the specified path.
	Actor Action	System Response										
1	Click on File->Save as	Bring up the save dialog										
2	Enter a path to save to and click the Save button.	Write the file to the filesystem at the specified path.										
Variations:	1. User clicks on File->Save, then write to the prespecified path without bringing up the save dialog.											
Exceptions												
Developer Notes:												

Use Case ID:	US-02
Use Case Name:	As a user I can load an image
Description:	Users are able to load images with the correct format.

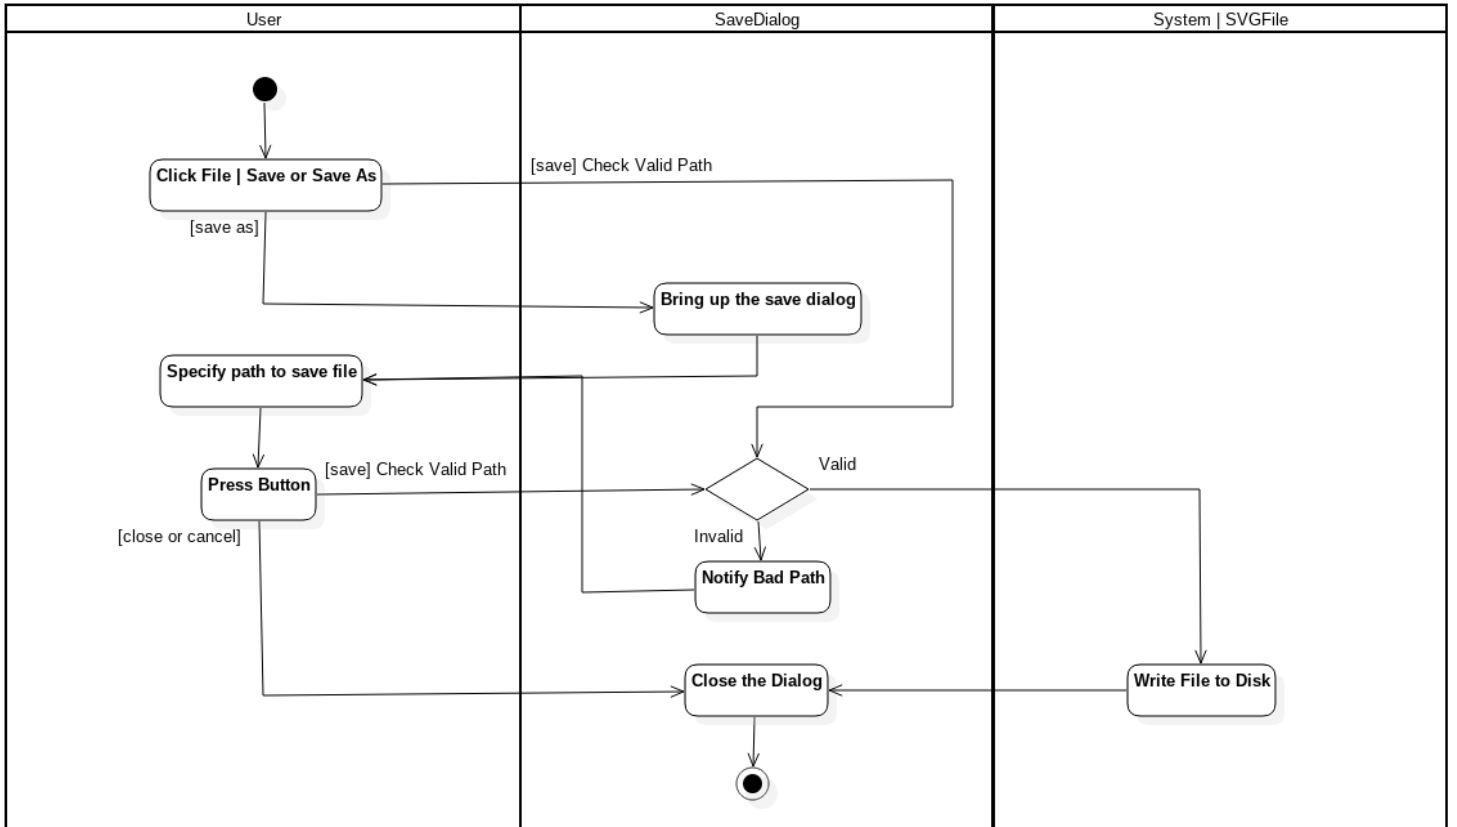

Actors	Users										
Pre-conditions:	None										
Post-conditions:	The file has been loaded into the program and is visible.										
Frequency of Use:	Daily										
Flow of Events	<table> <tr> <th></th><th>Actor Action</th><th>System Response</th></tr> <tr> <td>1</td><td>Click on File->Open</td><td>Bring up the open dialog</td></tr> <tr> <td>2</td><td>Enter a path of an image to load.</td><td>Check if the image is in the correct format and if so open the file and display its contents on the canvas.</td></tr> </table>			Actor Action	System Response	1	Click on File->Open	Bring up the open dialog	2	Enter a path of an image to load.	Check if the image is in the correct format and if so open the file and display its contents on the canvas.
	Actor Action	System Response									
1	Click on File->Open	Bring up the open dialog									
2	Enter a path of an image to load.	Check if the image is in the correct format and if so open the file and display its contents on the canvas.									
Variations:	1. If user has an image open already prompt to save or discard current image.										
Exceptions											
Developer Notes:											

Use Case ID:	US-03
Use Case Name:	As a user I can rotate the canvas.
Description:	Users are able to rotate the entire canvas. This rotation passes on to every object on the canvas.

Actors	Users										
Pre-conditions:	A user has an image open.										
Post-conditions:	The canvas and all objects on the canvas have been rotated by the degrees and in the direction specified.										
Frequency of Use:	Daily										
Flow of Events	<table> <tr> <th colspan="2">Actor Action</th><th>System Response</th></tr> <tr> <td>1</td><td>Click on Edit-> Canvas->Rotate</td><td>Bring up the rotate Dialog</td></tr> <tr> <td>2</td><td>Specify the direction (CW or CCW) and the amount to rotate the image.</td><td>Rotate the canvas and every object on the canvas.</td></tr> </table>		Actor Action		System Response	1	Click on Edit-> Canvas->Rotate	Bring up the rotate Dialog	2	Specify the direction (CW or CCW) and the amount to rotate the image.	Rotate the canvas and every object on the canvas.
Actor Action		System Response									
1	Click on Edit-> Canvas->Rotate	Bring up the rotate Dialog									
2	Specify the direction (CW or CCW) and the amount to rotate the image.	Rotate the canvas and every object on the canvas.
